Frequently asked questions

The camera won't open · I'm not getting alerts · I changed phones · AI features don't respond · Which version do I have?

👋 Getting started

NoPencil is your grocery list on your phone: scan or say what you need, check it off at the store, waste less food and take care of your money.

Open NoPencil

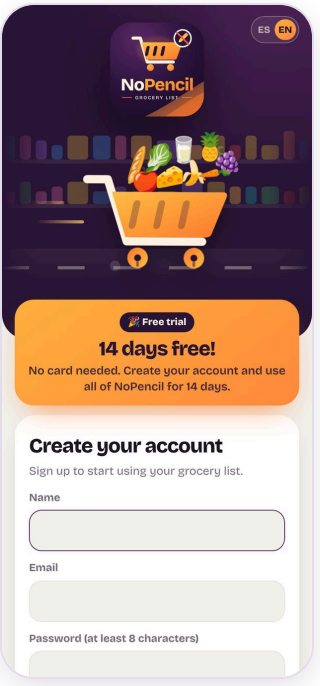

Go to **www.nopencil.app** in your phone's browser (Safari on iPhone, Chrome on Android).

Install it on your phone

1. **iPhone:** in Safari tap **Share** (the square with the arrow), then **Add to Home Screen**.
2. **Android:** in Chrome tap ⋮, then **Install app** or **Add to Home screen**.
3. Open NoPencil from the new icon. It works like an app and can send you alerts.

Create your account

1. Enter your **name**, your **email** and a **password** with at least 8 characters.
2. Tap **Create account**. You start with **14 days free**, no card needed.
3. Already have an account? Tap **I have an account: sign in**.

If you forgot your password

On the sign-in screen tap **Forgot your password?**, enter your email and request your 6-digit code. Enter the code and your new password. The code lasts 30 minutes.

Choose the language

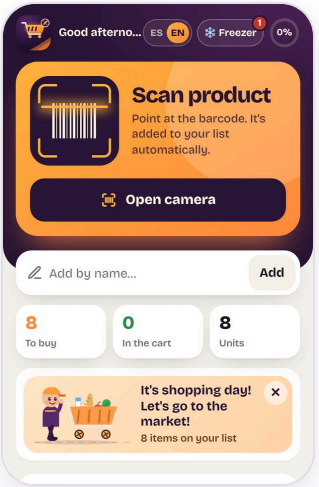

Tap **ES** or **EN** at the top of the screen. The whole app switches to Spanish or English, including this guide.

> 💡 If the app looks mixed in two languages, it's the browser's automatic translator. Tap the translator icon and choose **Show original** or **Never translate this site**.

The main screen

This is your list. Everything else opens from the **Everything you can do** menu further down.

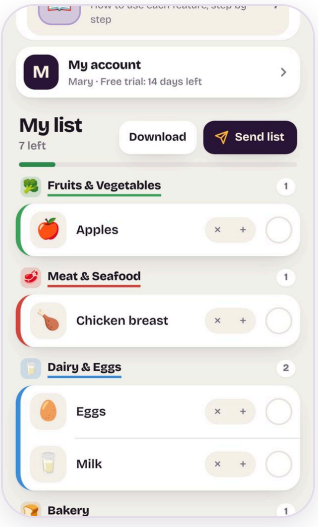

At the top

1. **Freezer**: opens your Freezer, Fridge and Pantry. The red number shows items about to expire.
2. The circle with **%** shows how much of your list is already in the cart.
3. **Scan product → Open camera**: add items with their barcode.
4. **Add by name**: type the item and tap **Add**. Suggestions appear as you type.
5. The counters show what's left **To buy**, what's already **In the cart** and the **Units**.

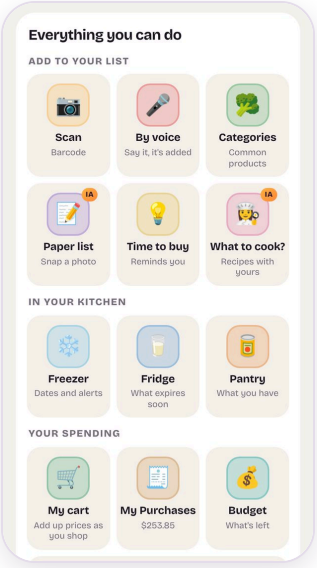

Your list

1. Items sort themselves into **categories** (produce, meat, dairy...).
2. Use **–** and **+** to change the quantity.
3. At the store, tap the **circle** on the right (or the name) when you put it in your cart.
4. Tap the item's picture to move it to another category. NoPencil remembers it next time.
5. **Remove bought** clears what you checked off. **Download** saves the list to a file and **Send list** sends it by message.

The «Everything you can do» menu

Features are grouped into **Add to your list**, **In your kitchen**, **Your spending** and **Family and account**. At the end is the **User guide** button. Those marked **AI** use artificial intelligence and need internet.

Add to your list

Scan

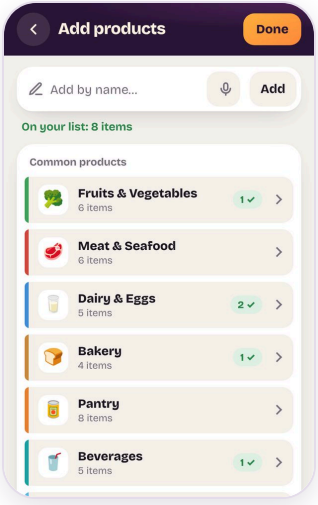

1. Tap **Scan** (or the orange **Scan** button at the bottom).
2. The first time, allow camera access.
3. Point at the barcode: the item is added automatically. You can scan several in a row.
4. If it's dark, tap **Flashlight**. If it won't read, tap **Type code**.
5. Tap **Done** to finish.

By voice

1. Tap **By voice**, then the microphone 🎤.
2. Say what you need, for example: «milk, eggs and two avocados».
3. The items are added to your list, each in its category.

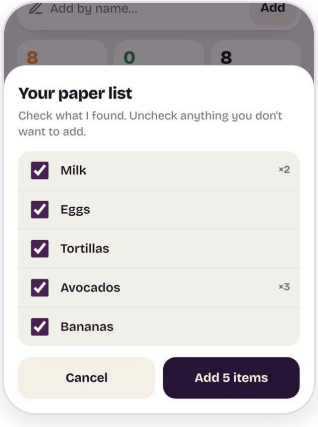

Categories

1. Tap **Categories** to see common products sorted by aisle.
2. Tap a category, then the products you want: one tap adds them.
3. Not there? Type it in **Not here? Type it here** and it's saved in that category.

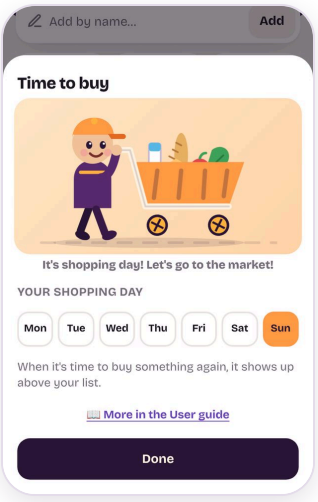

Paper list (AI)

1. Tap **Paper list** and take a photo of your handwritten list.
2. The AI reads it and shows you the items it found.
3. Uncheck anything you don't want and tap **Add**.

💡 Take the photo up close, in good light, with the whole list visible.

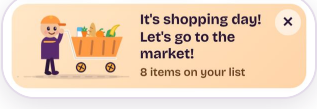

Time to buy

1. NoPencil learns how often you buy each thing (coffee, tortillas, milk...).
2. To teach it, check items off as bought when you put them in your cart. After 2 purchases of the same thing it starts reminding you.
3. When it's time, the item appears above your list: tap **+** to add it or **✕** for not now.

Your shopping day

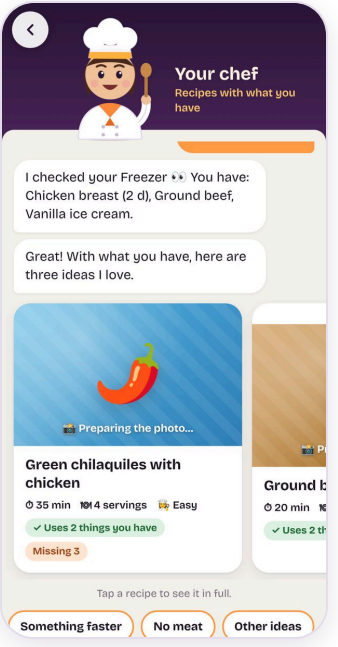

1. In **Time to buy**, tap the day (or days) you usually go grocery shopping.
2. On that day, the NoPencil buddy appears above your list pushing his cart: «It's shopping day! Let's go to the market!».
3. Tap **✕** to hide it for the day. To change the day, tap the buttons again.

What to cook? (AI)

1. Tap **What to cook?**. Your chef greets you and asks what you'd like to cook.
2. Answer with the buttons (**Something quick**, **Not in the mood**, **Check my Freezer**, **Check fridge & pantry**) or type whatever you're craving.
3. If you ask her to check your Freezer, fridge or pantry, the chef looks at what you have saved in NoPencil and suggests recipes with it.
4. Tap a recipe to see the full recipe card.

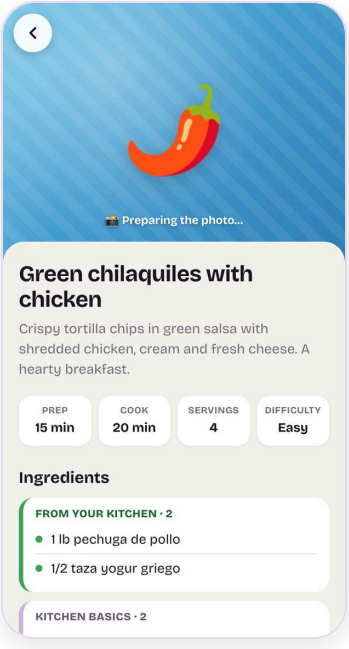

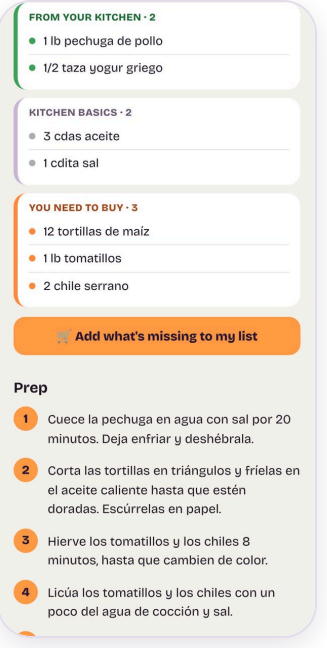

The recipe card

1. At the top you see the dish photo, the name, prep and cook time, servings and difficulty.
2. Ingredients are split into **From your kitchen**, **Kitchen basics** and **You need to buy**.
3. Tap **Add what's missing to my list** and they're added for you.
4. Follow the numbered steps and the tips. Tap the arrow to go back.

💡 The dish photo is created with AI and appears in a few seconds (it says «Preparing the photo...»). It shows how the dish can look.

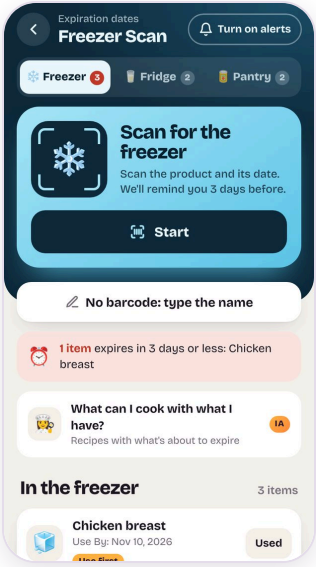

In your kitchen: Freezer, Fridge and Pantry

Keep track of what you have stored and get an alert before it expires.

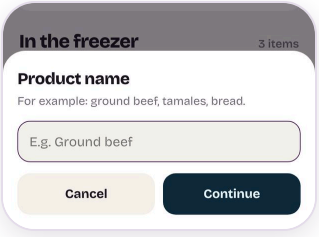

Open

Tap **Freezer**, **Fridge** or **Pantry** in the menu, or the **Freezer** button at the top. Switch places with the tabs.

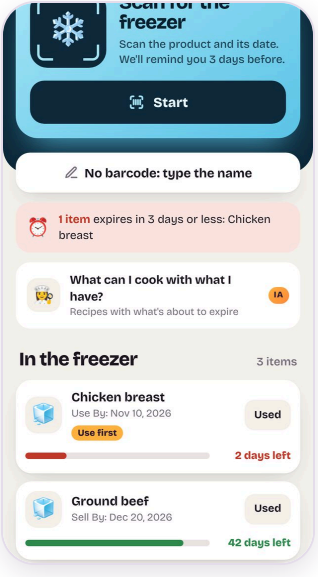

Add an item

1. Tap **Start** and scan the item's barcode.
2. Then point the camera at the date on the package. NoPencil reads it; if not, pick the date or how long you want to keep it.
3. No barcode? Tap **No barcode: type the name**, type the name and pick the date.
4. For store meat, chicken or fish, tap **Read label** and take a photo of the label.

Your items

1. They're sorted by what expires first. The color bar and «X days left» tell you how much time is left.
2. **Use first** marks the most urgent ones.
3. When you use it, tap **Used** and it leaves the list.

Turn on alerts

1. Tap **Turn on alerts** (the bell at the top).
2. Allow notifications when your phone asks.
3. You get a test alert and, from then on, an alert 3 days before each date.

> 💡 On iPhone, alerts only work with the app installed on your home screen (Share → Add to Home Screen).

What can I cook with what I have?

This button opens the **What to cook?** chef, who uses what's about to expire first.

💰 Your spending

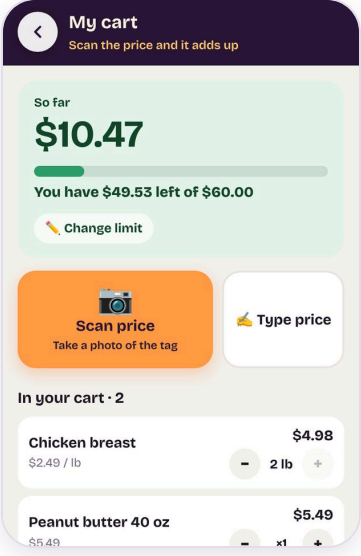

My cart

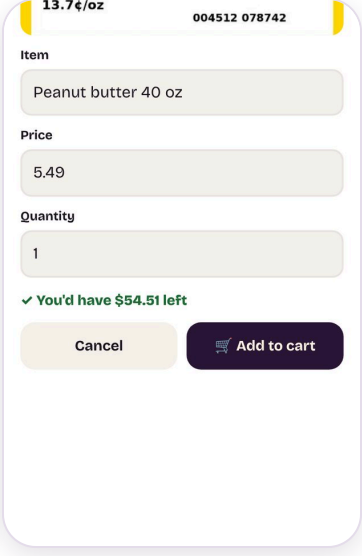

While you shop, it adds up prices and warns you before you go over what you can spend.

1. Tap **My cart**, then **Set a limit for this trip**. Enter how much you can spend.
2. If you want, enter the tax. In Texas most food is tax-free: leave it at 0 if you only buy food.
3. Each time you put something in your cart, tap **Scan price** and take a photo of the shelf tag.
4. Check the name, price and quantity. Before adding it, it tells you how much you'd have left or how much you'd go over.
5. Tap **Add to cart**. If the photo doesn't come out well, use **Type price**.
6. When you're done, tap **I'm done shopping** to clear it.

💡 At 80% of your limit, and if you go over, your phone vibrates and warns you.

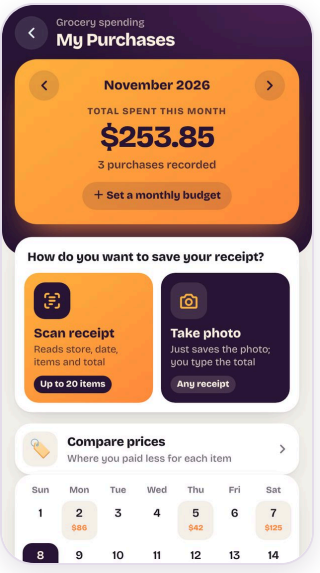

💡 It understands deals («2 for $5», sale and regular price) and items sold by the pound: it asks how much it weighs.

My Purchases

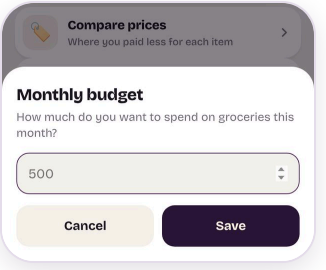

Save your receipts and keep track of what you spend on groceries each month.

1. At the top you see the **total spent this month**. Change months with the arrows.
2. To save a receipt choose **Scan receipt** (reads store, date, items and total, up to 20 items) or **Take photo** (just saves the photo and you type the total).
3. You can also tap a day on the calendar and record a purchase by hand.
4. Tap a purchase to view, fix or delete it.

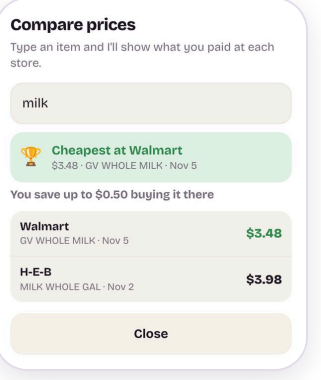

Budget

1. Tap **Budget** (or **Set a monthly budget** in My Purchases).
2. Enter how much you want to spend on groceries this month and tap **Save**.
3. NoPencil warns you at 80% and if you go over.

Compare prices

1. Tap **Compare prices** and type an item (for example, milk).
2. You'll see what you paid at each store, from your scanned receipts, and where it was cheapest.

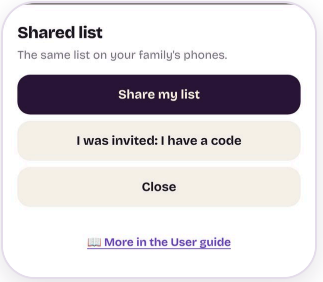

💡 The more receipts you scan in My Purchases, the better your comparisons.

Family and account

Shared list

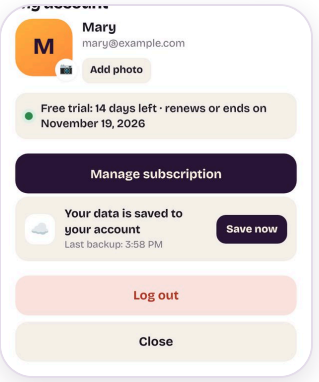

1. Tap **Shared list**, then **Share my list**.
2. If your family member already has NoPencil, tap **Invite with their NoPencil email** and type the email they sign in with.
3. They just open NoPencil as usual: «... invited you to their list» appears and they tap **Join the list**. No codes.
4. If they don't have NoPencil yet, tap **Send link**. When they open it and create their account, they join automatically. They can also tap **I was invited: I have a code** and type the code.
5. You only do this once. From then on, whatever anyone adds, removes or checks off shows on every phone within seconds.
6. To stop sharing, tap **Leave shared list**. You keep a copy.

Send list

Tap **Send list** to send what's left to buy by message (WhatsApp, SMS...). With **Download**, in My list, you save the list to a file.

My account

1. Tap **My account** to see your name, photo and plan.
2. **Add photo**: set your profile picture.
3. Your data is saved to your account automatically. **Save now** makes a copy right away. If you change phones, sign in with the same email and everything comes back.
4. **Manage subscription**: change or cancel your plan.
5. **Sign out**: leaves your account on that phone.

Plans

1. **Free trial**: 14 days with everything, no card.
2. **Individual plan**: $5.99 a month.
3. **Family plan**: $9.99 a month. People who join your shared list get in free with your plan.
4. If you cancel, you can use NoPencil Plus until the end of the period you paid for.

Frequently asked questions

The camera won't open

Allow the camera for NoPencil in your browser or phone settings and try again. Meanwhile, you can type the code.

I'm not getting alerts

Make sure you turned on alerts in the Freezer and that your phone allows NoPencil notifications. On iPhone, the app must be installed on your home screen.

I changed phones

Install NoPencil and sign in with the same email and password. Your list, purchases and Freezer come back automatically.

AI features don't respond

They need internet. Each account has a daily usage limit; you can use them again the next day.

Which version do I have?

Open **My Purchases** and scroll to the bottom: it shows the app version. If you don't see something new, close NoPencil completely and open it again.
